Experience

Front End Developer - Freelance - Upwork - San Jose, CA	Dec 2019 to Present
----------------------------------------------------------------	----------------------------

Worked on multiple projects to develop the web pages from the scratch to customizing the existing pages and fixing the issues according to the contracts.

gogetemsports.com is an e-commerce website for sports gear, fitness clothing and electronic products. Developed a react form to collect the user input along with the validation and posted data back to the server. Implemented the advanced filters and search components for the various products with different criterias. Updated the navigation menu, landing page grid view and sub menu styles with the latest styles using Bootstrap. Modified the product description page to show the tags for various attributes and also to show the similar, also purchased and recommended products using the tag and carousel component.

a1cell4u.com is an online cell phone, tablet and PC repair store to book appointments and trade items. Developed the landing page to showcase the services catalogue like cell phone, tablet and computer repair. Implemented the completed schedule appointment widget by allowing the user to choose manufacturer, model, problem and the appointment type by showing the available dates to the user. Developed the details form to complete the appointment confirmation with all the validations.

paleorecipe.a1cell4u.com is an email subscription campaign website for paleo snack recipes. Developed the website from the scratch to show the recipe book, countdown timer and email input for the subscription. Added Terms, Privacy, Disclaimer and Contacts pages. Integrated with campaign services.

Technologies: HTML5, JavaScript, CSS3, ReactJS, Bootstrap, jQuery, AJAX and JSON

UI Developer Intern - Cloudchip Technologies - Hyderabad, India

Jun 2016 - Aug 2017

Cloudchip provides a ready to use scalable IoT cloud infrastructure for connecting the Internet of Things.

Developed complete user management, attendance and performance tracking system from the UI perspective.

Closely worked with business system analysts to understand the requirements to ensure that the right set of UI modules were built.

Utilized HTML5, CSS, JavaScript, JQuery, and AJAX to create a user login system that allowed customers to login.

Developed the complete layout of the pages of websites using CSS for multiple browsers.

Developed a single page, mobile-first, cross-device web application for real-time location sharing utilizing AngularJS, JavaScript API.

Created AngularJS controllers, services and used AngularJS filters for filter functionality in the search box.

Utilized AngularJS inbuilt directives and also used custom directives for the ones that are not available.

Worked closely with the SQA team in fixing the reported bugs/defects and checking cross platform compatibility.

Technologies: HTML5, JavaScript, CSS3, AngularJS, Bootstrap, jQuery, AJAX, Java and JSON

Self Projects

Kwizz app - <https://geeekwiz.web.app/>

Aug 2020 - Present

This is a technical quiz app which has different categories to select and present with a set of questions and multiple choices. After the test completion score card will be shown to the user with the results. Currently it is a work in progress state. Planning to complete and launch it soon in a straight domain.

Sid Sriram Music portfolio - <https://sidsriram.now.sh/>

March 2020 - May 2020

This is also another static website to show the portfolio of a famous Indian singer Sid sriram. His songs and albums.
